

Energy Use Policy

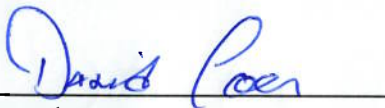

Coen Steel is committed to minimising our impact on the environment as far as possible, in order to preserve our environment for the benefit of present and future generations.

Coen Steel will strive to lead by example to meet the highest energy management standards and be at the forefront of sustainable development.

We aim to deliver this commitment by:

- Promoting the concept of energy efficiency at all levels in the organisation amongst staff, contractors, customers and other stakeholders.
- Identifying improved energy efficiency technologies.
- Increasing our solar panel capacity and using 100% renewal energy sources.
- Complying with all relevant energy legislation, legal and regulatory requirements, that relate to energy use and consumption.
- Setting objectives and targets and developing energy action plans.
- Measuring energy use on an ongoing basis and using this information to regularly review policy, objectives, targets and allocation of resources.
- Providing our staff with the necessary awareness, education and training to implement this policy.
- Communicating this Energy Policy to everyone within the company.

This policy will be reviewed on a regular basis to incorporate new regulations, laws, initiatives and available technologies.

David Coen
Managing Director
